

CASE STUDY: Constuction

Jamie Anderson South London

BACKGROUND

I am currently unemployed and was referred to Ixion to get me back into work. Although I have done quite a lot of construction work I have no formal qualifications. Upon starting my course I was greeted by my tutors and they quickly made me feel at ease. My tutors are experts in their fields and were more than happy to share their expertise with me in a peaceful and welcoming environment.

I now believe in myself and with their tuition and instruction I am more confident and ready to go into the world and make a better life for myself working in the construction industry. I would recommend this course to anyone who has trouble getting into work in the construction environment. We also had training on employability that teaches you how to write a C.V. and how to conduct yourself in an interview.

I really enjoyed the brickwork. We learnt all about the tools and techniques and before I knew it I was building a boiler chimney followed by a wall with a pier.

A DAY IN THE LIFE OF...

I have just finished the course and I am starting a 2 week work experience program with Green Skills for Willmot Dixon. We have been coached in Health & Safety and I am about to sit my CSCS test. Thanks to the people at Ixion I am feeling really confident. I have been given all my PPE and once I have the card I am all set for full time employment.

Thanks to Ixion and their brilliant tutors I will have a level 1 qualification and am hopefully on the way to full time employment

WHAT THE FUTURE HOLDS

To be qualified to be on site with the knowledge of Health & Safety and more importantly to go on with training to be fully qualified and proficient in a well paid trade.
