

Level 2 Apprenticeship in Warehousing and Storage (QCF) (Logistics)

About the course

This course is designed to reflect the work of warehousing and storage staff across a wide range of industries and types of organisation and is for those who are working with some autonomy and personal responsibility.

It is an entirely work-based qualification where each student will be allocated a work-based assessor to support and guide them through their studies.

Structure of Course

The NVQ requires candidates to complete units that add up to a minimum of 27 credits; this includes two mandatory units and optional units taken from 6 groups.

Students will be allocated a personal assessor and supplied with all the necessary reading and assessment material. The assessor will provide personal tutorial support at pre-arranged times, students will also be assessed in the workplace using observation, witness testimonies and professional discussion for the NVQ.

Assessment

Assessment of the NVQ is by production of a personal portfolio of evidence demonstrating understanding and application of the level 2 certificates in Warehousing and Storage performance criteria. Functional Skills require students to work towards written exams in Maths and English and their assessor will prepare and support them with these subjects until they are ready to sit the exams. All exams can be sat either in the workplace or at BCOT. The Award in Right and Responsibilities is assessed by the student completing a workbook which is marked by their assessor.
