

CASE STUDY: Security

Ruth Laidler

BACKGROUND

I have been working in the security industry for a while now; I have enjoyed it a lot, especially because of the training courses I have undertaken. These have helped me to learn new skills and gain a lot of knowledge.

Before I started the training I was nervous due to the stories that I had heard. When I started training, my tutor helped me get over this nervousness by giving me the right knowledge and training, helping me learn more about the industry and how to progress. I have gained a lot of knowledge about the laws that relate to my work, and have even been able to gain from the tutor's knowledge and experience.

"The course was great and the tutor was amazing."

The course was great and the tutor was amazing. I received all the help, guidance and encouragement I could have asked for. I would recommend the course to anyone who is involved in this industry and wants to gain better skills, knowledge and career progression.

A DAY IN THE LIFE OF

I usually work individually but sometimes as a part of a team. At the start of the day, our jobs are allocated to us which we need to carry out throughout the day. Whenever help is required, we just ask for it over the radio and someone from the team comes around to help out. At the end of the shift, I get the satisfaction that I was able to secure people lives around me.

"I get the satisfaction that I was able to secure people lives around me."

The qualification and knowledge received has given me a real advantage over others in the industry, it has given me the confidence to progress further in my career.

FUTURE

I would like to prove myself as a dedicated security professional and progress onto supervisory and managerial positions.
